How to Set Up Apple Pay

1. Open the Wallet App on your device.

2. Tap the black and white **plus** button in the top right corner. Then, click **Debit or Credit Card**.

3. Press the blue **Continue** button.

4. You will then be prompted to scan your card. Hover your phone over your card within the frame to get all the card information.

5. You will then be prompted to verify your card details. If all the information is correct, press the blue **Next** button in the top right corner. NOTE: If scanning your card does not work, select to enter your card information manually at the bottom.

6. Enter your card expiration date and security code. Once done, press the blue **Next** in the top right corner.

7. Agree to the terms and conditions by clicking the blue **Agree** button in the bottom left corner.

8. Complete the Card Verification by choosing to send a text message to your phone or call the bank. Then press the blue **Next** button in the top right corner. **If you chose text, enter your number to receive a verification text.

9. You will be asked if you want to set the card as the Default Card in your wallet. If it's the only card in your wallet, it will automatically be set as the default. If you have other cards in your wallet, you can decline to set it as your default by pressing the blue **Not Now** button.

10. If you have an Apple Watch, it will prompt you to add the card to the watch. You can press **Add Now** or press **Done** in the top right corner.

11. Your card is now stored in the wallet and available for use!
